

Vertical Inline Chemical Transfer Pump

This vertical pump is engineered for efficient fluid transfer in industrial applications. It features a corrosion-resistant thermoplastic pump body and is designed for reliable performance and ease of maintenance.

Product Overview

Industrial Fluid Transfer Solution

The vertical inline chemical transfer pump is engineered for efficient and reliable fluid handling in demanding industrial environments. Constructed with a durable thermoplastic pump body, it offers excellent corrosion resistance for a variety of process chemicals. This vertical configuration ensures a compact footprint while maintaining ease of maintenance and long-term operational stability.

General Specifications

Pump Configuration	Vertical Inline
Body Material	Thermoplastic
Key Features	Corrosion Resistant, Vertical Discharge, Flanged Motor Mount, Threaded Inlet

Certifications & Origin

Origin
Taiwan
