

# Vertical Inline Industrial Pump

This vertical inline pump is designed for industrial applications. It features a stainless steel pump body and an electric motor, complete with a pressure gauge and piping for monitoring performance.

## Product Overview

### Industrial Vertical Inline Pump

This vertical inline industrial pump is engineered for demanding fluid handling applications in professional environments. Featuring a robust construction with a durable stainless steel pump body, it ensures longevity and resistance to corrosion. The unit is equipped with a high-performance electric motor and integrated instrumentation, including a pressure gauge and piping, to allow for precise monitoring and reliable operation in various industrial settings.

## Technical Specifications

### Application

Industrial Use • Fluid Handling

### Body Material

Stainless Steel

### Mounting

Vertical Inline

### Integrated Instrumentation

Pressure Gauge, Piping
