

Vertical Inline Oil Pump for Industrial Machinery

This vertical inline oil pump is designed for industrial applications. It features a robust motor mounted on a stable support structure and includes a flange for secure mounting and an electrical enclosure.

Product Overview

Industrial Vertical Inline Oil Pump

This vertical inline oil pump is engineered for reliable performance in demanding industrial machinery environments. Designed for continuous duty, it features a robust aluminum construction for both the pump body and motor housing, ensuring durability and efficient heat dissipation. The unit is equipped with a versatile motor capable of single or three-phase operation, making it suitable for a wide range of industrial applications.

Construction Materials

Pump Body	Aluminum
Motor Housing	Aluminum
Impeller	Plastic
Shaft with Rotor	45# Steel
Bearing	C&U or local bearing

Motor Specifications

Insulation Class Class E	
Protection Rating IP44	
Phase	Single phase, Three phase

Operational Details

Operating Conditions	Continuous duty
