

# Vertical Lifting Elevator

This is an elevator. It facilitates vertical transportation in buildings.

## Overview

### High-Performance Vertical Lifting Solution

This vertical lifting elevator is engineered for robust industrial and commercial applications, providing reliable and efficient material or passenger transport. Designed with safety and durability as core priorities, it integrates seamlessly into complex logistics environments. Its heavy-duty construction ensures consistent operation under demanding conditions, making it an essential asset for modern infrastructure.

## Performance Metrics

### Rated Lifting Capacity

**2000 kg**  
Max Load

Operating Speed	0.5 m/s
-----------------	---------

## Technical Specifications

Drive System	Hydraulic
Safety Certifications	CE, ISO 9001, Emergency Stop System
Power Requirements	380V / 50Hz / 3-Phase

## Construction

Surface Finish	Anti-Corrosion • Powder Coated
Chassis Material	Reinforced Carbon Steel
