

Vertical Lifting Elevator for Buildings

This vertical elevator efficiently moves people and goods in multi-story buildings. It provides a safe and reliable mode of transportation between different levels.

Overview

Vertical Lifting Elevator for Buildings

This vertical lifting solution is engineered for efficient building transport, providing reliable performance for various architectural applications. Designed with safety and durability in mind, it ensures smooth vertical mobility for passengers or goods. The system integrates robust mechanics to meet the demands of modern infrastructure projects.

Technical Specifications

Model Identifier	YD094
Length	11 m
Width	15 m
