

Vertical Machining Center

This vertical machining center is designed for precision milling, drilling, and tapping. It features a rigid frame, high-speed spindle, and advanced CNC control for efficient material removal and accurate part production on metals, plastics, and composites.

Overview

Precision Vertical Machining Center

This vertical machining center is engineered for high-precision milling, drilling, and tapping operations. Built with a rigid frame construction and a high-speed spindle, it ensures efficient material removal and consistent accuracy for complex part production. It is a versatile solution suitable for processing a wide range of materials, including various metals, industrial plastics, and composites.

Key Features

Compatible Materials

- Metals
- Plastics
- Composites

Capabilities

Milling, Drilling, Tapping

Technical Specifications

Frame Construction

Rigid Frame

Model

XK713

Performance

Control System

Advanced CNC
