Product Overview

Professional Vertical Masticating Juicer

This vertical masticating juicer is engineered for maximum nutrient retention and efficient juice extraction. Utilizing a slow-speed, double auger system, it mimics the motion of hand-squeezing to ensure high yields from fruits, vegetables, and leafy greens. With its durable Tritan construction and powerful motor, this appliance is designed for reliable, heavy-duty performance in any professional or high-end kitchen environment.

Technical Specifications

Motor Power

200 W

Power Output

Rotation Speed	52 RPM
Voltage Compatibility	100-240V, 50/60Hz

Design & Build

Material Composition	Heavy-duty Tritan strainer and auger (8x stronger than standard plastic)
Control Interface	Waterproof soft-touch panel with tempered glass

Compliance & Quality

Certifications	CE, GS, ROHS, LFGB, CB
