

# Vertical Masticating Slow Juicer

This slow juicer is designed for extracting juice from fruits and vegetables. It features a vertical design that minimizes heat and oxidation, preserving nutrients and enzymes.

## ADDITIONAL IMAGES

## Product Overview

### Professional Vertical Masticating Juicer

This high-efficiency vertical slow juicer is engineered for optimal nutrient retention through a low-speed 60 RPM extraction process. Designed for versatility, it handles everything from leafy greens and hard vegetables to soft fruits and soy milk production. With integrated safety features including Hall sensors and waterproof switches, it offers a reliable and quiet solution for commercial or heavy-duty home use.

## Technical Specifications

### Power Rating

**150 W**

Rated Power

Operating Speed: 60 rpm

Noise Output: 65 dB

## Operational Limits

Continuous Usage Time: Less than 30 minutes

## Safety & Control

Safety Certifications & Mechanisms: Waterproof Switch, Hall Sensor, PC Board Controlled, DC Motor

## Applications

### Versatile Extraction Capabilities

- Vegetable extracting
- Fruit juice
- Soy milk production
