

Vertical Metal Drilling Machine

This vertical drilling machine is designed for precision metalworking. Its robust construction features a cast iron base and column for stability and vibration dampening.

Product Overview

Professional Vertical Metal Drilling Machine

This heavy-duty vertical drilling machine is engineered for precision metalworking applications. Its robust construction features a cast iron base and column, providing exceptional stability and superior vibration dampening during intensive use. Designed for high efficiency, it includes a multi-speed gearbox and an integrated coolant system to ensure optimal tool longevity and consistent drilling performance.

Key Features

Certifications

CE

Technical Specifications

Build Construction

- Cast iron base
- Cast iron column

Operational Capabilities

Worktable Adjustments

- Height adjustable
- Tilttable for angled drilling

Safety and Maintenance

Safety Features

Emergency stop button • Spindle guard

Cooling System

Yes
