

Vertical Milling Machine

This vertical milling machine is designed for precision metal cutting operations. It features a robust construction with a vertical spindle orientation, suitable for a variety of milling applications.

Overview

Precision Vertical Milling Solutions

The vertical milling machine is engineered for high-precision metal cutting operations, featuring a robust vertical spindle configuration. It provides extensive X, Y, and Z axis travel capabilities, making it ideal for complex machining tasks in sectors such as aerospace, automotive, and mold production. With high-accuracy positioning and a versatile control system, this machine ensures efficient performance for drilling, tapping, and surface finishing.

Machine Dimensions

Table Size	1300 mm
Exterior Dimensions (LxWxH)	2650x3000x2500 mm

Performance

Axis Travel (X/Y/Z)

1050 mm

X-axis

800 mm

Y-axis

500 mm

Z-axis

Spindle Configuration

Parameter	Value
Taper	BT50
Max Speed	3000 rpm
Motor Power	5.5/7.5 kW

Accuracy

Positioning Accuracy	+/- 0.015 mm
Repositioning Accuracy	+/- 0.005 mm

Control System

Compatible CNC Systems	Mitsubishi E60, M64AS, FANUC
------------------------	------------------------------
