

Vertical Milling Machine

This vertical milling machine is designed for precision metalworking. It features a variable-speed spindle and a multi-axis table, making it suitable for drilling, milling, and tapping operations.

Overview

Precision Vertical Milling Solution

This vertical milling machine is engineered for high-precision metalworking operations, offering versatile capabilities for drilling, milling, and tapping. Built with a sturdy cast iron frame, the machine provides excellent vibration dampening to ensure accuracy during complex machining tasks. Equipped with a CNC control system and a multi-axis table, it is an ideal solution for prototyping, mold making, and the production of precision parts.

Technical Specifications

Control System

CNC

Machining Capabilities

Milling, Drilling, Tapping, Boring

Spindle Type

Vertical

Construction & Design

Key Features

- Variable-speed spindle
- Multi-axis worktable
- Integrated coolant system
- Vibration dampening frame

Frame Construction

Cast Iron
