

Vertical Milling Machine with Digital Control

This milling machine has a table area of 250 x 1120mm and axis travels of 540mm (X), 250mm (Y), and 300mm (Z). It features a spindle speed range of 70 to 4600 r/min and a 2.2 kw (3 HP) main motor.

Overview

Precision Vertical Milling Machine

This vertical milling machine is engineered for high-precision machining tasks, featuring a robust construction that ensures stability and operational accuracy. It is equipped with an integrated digital control panel, allowing for precise monitoring and streamlined operation. Designed for versatility, this machine is suitable for processing a wide range of materials efficiently.

Key Features

Core Capabilities

- Digital control panel for precise operation
- Robust construction for enhanced stability
- Integrated coolant system
- High-precision machining

Maintenance & Efficiency

Extended tool life, Efficient machining, Precision monitoring
