

Vertical Multistage Centrifugal Pump

This vertical multistage centrifugal pump is designed for water supply and pressure boosting. Its stainless steel construction ensures corrosion resistance and efficient performance in diverse applications.

Product Overview

Industrial Vertical Multistage Centrifugal Pump

This vertical multistage centrifugal pump is engineered for high-efficiency liquid transfer and reliable pressure boosting. Featuring a durable stainless steel impeller construction, it offers a compact, space-saving design suitable for vertical pipeline installations. Its robust architecture ensures long-term performance across industrial, commercial, and water supply applications.

Performance Specifications

Flow Rate Capacity

0.4 m³/h

Min Flow

240 m³/h

Max Flow

Head Range

305 m

Technical Details

Power Rating

0.37 kW to 110 kW

Liquid Temperature

15 °C to +120 °C

Operating Frequency

50 Hz, 60 Hz

Design and Maintenance

Material Composition

- Stainless steel impeller
- Stainless steel stamping/welding or precision casting

Installation

Vertical Pipeline • IEC/NEMA Compatible
