

Vertical Multistage Centrifugal Pump

This vertical multistage centrifugal pump is designed for pumping clean, non-aggressive fluids. It features a robust construction with stainless steel pump body and cast iron motor housing.

Overview

High-Efficiency Vertical Multistage Pump

The Vertical Multistage Centrifugal Pump is a high-performance solution engineered for the efficient handling of clean, non-aggressive fluids. Featuring a robust stainless steel body paired with a durable cast iron motor housing, it offers exceptional reliability for demanding industrial environments. This unit is ideal for applications such as water supply, pressure boosting, and liquid transfer, ensuring consistent performance and energy efficiency.

Technical Specifications

Model	CV15
Materials	Stainless Steel Pump Body, Cast Iron Motor Housing
Fluid Compatibility	Clean, non-aggressive fluids

Applications & Features

Primary Applications

- Water Supply
- Pressure Boosting
- Liquid Transfer

Installation

Flange Connection

Motor Type	Yes
------------	-----
