

Vertical Multistage Pump

This vertical multistage pump is designed for high-pressure and high-flow rate applications. The pump's vertical configuration saves space and simplifies the installation process.

Overview

High-Performance Vertical Multistage Pump

The YMPVS Series is a versatile vertical multistage pump engineered for high-pressure performance in space-constrained environments. Designed for reliability, this unit is ideal for water supply systems, pressure boosting, and demanding industrial processes. Its robust construction ensures long-term operational efficiency across agriculture, irrigation, and drainage applications.

Performance

Key Performance Metrics

60 hp

Max Power

178 m

Max Head

110 m³/h

Max Flow

Technical Specifications

Parameter	Range
Power Range	0.5 - 60 hp
Suction Lift	7 - 9 m
Total Head	13 - 178 m
Flow Rate	2.4 - 110 m ³ /h

Electrical

Operating Frequency

- 50Hz
- 60Hz

Supported Power Configurations | 110V, 220V, 380V

Customizable Voltage | Yes
