

Vertical Multistage Water Pump

This vertical multistage pump is designed for water supply, pressure boosting, industrial liquid transfer, and irrigation. It features a robust construction for reliable performance in demanding environments and is suitable for pumping clean, non-corrosive liquids.

Product Overview

High-Efficiency Vertical Multistage Design

This vertical multistage water pump is engineered for demanding industrial and commercial applications requiring consistent pressure and flow. Its robust construction ensures reliable performance in essential systems such as water supply, pressure boosting, and agricultural irrigation. Designed specifically for clean, non-corrosive liquids, it serves as a durable solution for high-head liquid transfer needs.

Key Features

Build Quality

Robust Construction • Vertical Multistage • High Durability

Primary Applications

Water Supply, Pressure Boosting, Industrial Liquid Transfer, Irrigation

Suitable Media

Clean, non-corrosive liquids
