

Vertical Pipe Energy Dissipator for Paper Machinery

This vertical pipe energy dissipator is designed for paper production machinery. It is available in two sizes: DT110/B with a nominal diameter of 110mm and DT160/B with a nominal diameter of 160mm.

Product Overview

Vertical Pipe Energy Dissipator

This vertical pipe energy dissipator is specifically engineered for integration into paper production machinery. It serves a critical role in managing fluid dynamics and energy within the system, ensuring stable operation. The unit is available in two distinct configurations to accommodate different piping requirements.

Technical Specifications

Available Models

Code	Nominal Diameter
DT110/B	110
DT160/B	160

Measurement Units	mm
Application	Paper Machinery, Fluid Dynamics, Industrial Piping
