

Vertical Plastic Film Extrusion Machine

This vertical plastic extrusion machine produces plastic film and bags. It features a multi-level frame, extrusion die, and a blower system for cooling.

Product Overview

Vertical Plastic Film Extrusion System

This vertical plastic film extrusion machine is engineered for the efficient production of high-quality plastic films and bags. Featuring a robust, multi-level frame design, the system integrates a high-performance extrusion die at the apex with a precision-controlled blower system for optimal cooling. Its complex arrangement of rollers and guides ensures consistent film shape and tension, making it a reliable solution for industrial plastic manufacturing requirements.

Technical Specifications

Machine Configuration	Vertical Extrusion
Construction	Painted Metal
Cooling Mechanism	Yes

Key Features

Core Components

- Vertical extrusion die assembly
- Integrated blower cooling system
- Multi-level support frame
- Precision roller and guide system
