

Vertical Radiant Space Heater with Remote Control

This is a household electrical appliance designed for space heating. It features a vertical design with a heating element enclosed within a protective grill.

Product Overview

Versatile Radiant Heating Solution

This vertical radiant space heater is designed for efficient, targeted warmth in indoor environments. Featuring a stable vertical form factor with an integrated protective safety grill, it offers both performance and peace of mind. Users can manage the heating experience effortlessly using either the base-integrated control panel or the included remote control.
