

Vertical Rice Whitening Machine

This vertical rice whitener is designed for efficient rice processing. It features a feeding hopper, a whitening chamber with adjustable pressure, and a discharge outlet.

Product Overview

Professional Vertical Rice Whitening Solution

This vertical rice whitening machine is engineered for high-efficiency rice processing in industrial milling environments. It features a specialized whitening chamber with adjustable pressure settings to ensure optimal grain quality and throughput. Built from durable materials, the machine provides long-lasting, reliable performance for demanding rice production lines.

Technical Specifications

Components

- Feeding hopper
- Whitening chamber
- Adjustable pressure system
- Discharge outlet

Configuration	Vertical
Primary Application	Rice Milling, Grain Processing

Performance Features

Construction Grade

Heavy Duty • Long-lasting
