Product Overview

Professional Vertical Towel Warmer

This vertical steel panel radiator is designed for both efficient space heating and convenient towel warming. Engineered for high performance, it features a robust mild steel construction with a patented welding structure for improved durability and sealing. The unit is versatile, supporting both central hydronic and electric heating systems, making it a reliable solution for modern bathroom and residential environments.

Technical Specifications

Finishing

Chrome Plating (Cr 6+ / 3+) • Customized Powder Coating

Quality Certifications

EN442, ISO 9000, ISO 14001, SA8000

Material

Mild Steel (SPCC / Q195)
