

# Vertical Steel Plate Lifting Clamp

This vertical lifting clamp is designed for lifting steel plates. It is constructed from high-quality metal alloy steel.

## Product Overview

### Industrial Vertical Lifting Solutions

The Vertical Steel Plate Lifting Clamp is engineered for the safe and efficient transport of steel plates and structures in a vertical orientation. Constructed with a robust design, these clamps ensure a secure grip during heavy-duty lifting operations. This versatile tool is designed to meet the rigorous demands of industrial material handling, providing reliability and stability for diverse workplace environments.

## Technical Specifications

### Performance Data

Article No.	WLL per Pair (t)	Plate Thickness (mm)
SVC1	1	0-20
SVC2	2	0-25
SVC3.2	3	0-35
SVC5	5	0-50
SVC8	8	0-60

### Suitable Applications

Steel Plate Lifting, Structural Transport, Vertical Positioning
