

## Vertical TMR Feed Mixer for Cattle

This TMR feed mixer is designed for preparing cow feed. It ensures uniform mixing to optimize nutritional delivery to livestock.

### ADDITIONAL IMAGES

### Product Overview

Robust mixing chamber design for efficient cattle feed preparation.

### Efficiency in Cattle Nutrition

This vertical TMR feed mixer is engineered for professional cattle breeding operations to ensure precise, uniform blending of feed ingredients. By optimizing the nutritional delivery, the machine enhances animal health and productivity while significantly reducing manual labor. Designed for versatile agricultural environments, it offers durable construction and efficient operation for modern farms.

## Technical Specifications

Heavy-duty vertical auger system ensures a homogeneous blend of ingredients.

### Capacity Range

**3 cbm**

Minimum Capacity

**30 cbm**

Maximum Capacity

### Power Source

Tractor Driven

## Operational Features

### Primary Advantages

- Uniform and rapid feed mixing
- Labor-saving operation
- Customizable sizes available
- Improved feed efficiency

### Customization

Yes
