

Vertical Vacuum Sealing Machine

This vertical machine is designed for sealing and packaging products using vacuum technology. It features stainless steel construction, adjustable sealing parameters, and foot pedal operation.

Product Overview

High-Efficiency Vertical Vacuum Sealer

This vertical vacuum packaging machine is engineered for professional industrial applications requiring reliable, airtight seals. Constructed with durable stainless steel for long-term performance, it features adjustable sealing parameters to accommodate various packaging requirements. The design includes a convenient foot pedal for hands-free operation and an integrated shelf to support larger packages during the sealing process, ensuring consistency and ease of use.

Technical Specifications

Construction Material	Stainless Steel
Operation Mode	Foot Pedal (Hands-free)
Key Features	Vacuum Sealing, Vertical Orientation, Adjustable Parameters, Package Support Shelf

Applications

Suitable Applications

- Industrial packaging
- Airtight product sealing
- Large package handling
