

VGA Cable for Monitor Connection

This VGA cable is designed for connecting computers to monitors or projectors. It features robust connectors for a secure and reliable signal transmission and supports standard VGA resolutions for clear display output.

Product Overview

Professional VGA Display Connection

This high-performance VGA cable is engineered to ensure stable and reliable video signal transmission between computers and display devices such as monitors or projectors. Built with a standard UL20276 line, it offers fine texture and robust construction suitable for professional environments. The design prioritizes clear and crisp display output for all standard VGA resolution requirements.
