

# VGA Splitter Cable for Dual Displays

This VGA splitter cable duplicates a single VGA output to two VGA displays. The 1-foot cable provides a reliable connection for distributing video signals from a computer to multiple monitors or projectors.

## ADDITIONAL IMAGES

## Overview

### Reliable Dual Display Solution

This VGA Splitter Cable provides a cost-effective solution for duplicating a single VGA signal to two separate displays simultaneously. Designed for high-quality video distribution, it supports Full HD resolutions and features robust shielding to ensure signal integrity. It is an ideal choice for classrooms, conference rooms, and professional presentations where synchronized screen duplication is required.

## Technical Performance

### Performance Highlights

**1080 p**

Max Resolution

**1 ft**

Cable Length

**80 °C**

Max Temperature

### Supported Resolution

Up to 1920x1080 (Full HD)

### Voltage Rating

30 V

## Connectivity & Design

### Connector Setup

- 1x VGA Male Source Connector
- 2x VGA Female Output Connectors
- Molded strain relief for durability
- 24K Gold-plated components

### Construction Features

Shielded, VW-1 Flame Retardant, Low Voltage, Y-Splitter

## Applications

### Recommended Applications

- Classroom presentations
- Office dual-monitor setups
- Projector signal distribution
- Synchronized digital signage

## Compliance

### Safety Standards

VW-1 • 30V Rated
