

VGA/DVI KVM Extender with Audio and IR

This USB DVI/VGA KVM extender supports both DVI and VGA with resolutions up to Full HD 1080p. It extends keyboard, video, and mouse signals up to 150m over CAT.5e/6 cable.

Overview

Versatile KVM Extension Solution

This USB DVI/VGA KVM Extender provides a reliable solution for transmitting keyboard, video, mouse, audio, and IR signals over long distances. It supports both DVI and VGA video interfaces, ensuring compatibility with a wide range of display equipment. Designed for flexibility, it offers a base transmission range of up to 150 meters over standard CAT.5e/6 cabling, with the capability to extend further by daisy-chaining through network switches.

Technical Specifications

Maximum Resolution	Full HD 1080p
Transmission Distance	150 m
Compatible Cabling	CAT.5e, CAT.6

Features

Supported Interfaces

- USB (Keyboard/Mouse)
- DVI
- VGA
- Audio
- IR

Scalability	Yes
