

VHF Wireless Dual-Channel Microphone System

This VHF wireless microphone system is designed for professional audio applications. It features dual-channel operation and high-sensitivity capsules for clear sound reproduction.

Overview

Professional Wireless Audio Performance

The VHF Wireless Dual-Channel Microphone System is engineered for clear and accurate sound reproduction across various professional audio applications. With its robust dual-channel capability and reliable long-range wireless performance, it is an ideal solution for public speaking, performances, and dynamic presentations. The system features sensitive capsules and stable signal transmission to ensure professional-grade audio quality in every environment.

Technical Specifications

Frequency Range	210-270MHz
Modulation Mode	FM
Frequency Stability	± 0.005%

Performance Metrics

Operating Distance

50 m

Minimum Operating Distance

S/N Ratio

85 dB

S/N Ratio

Audio Quality

Frequency Response	40Hz-20kHz
T.H.D	0.2 %
Audio Dynamic Range	80 dB

Power and Connectivity

Receiving Power	AC220V
