

VHF Wireless Dual Microphone System

This VHF wireless microphone system delivers clear audio. It includes dual microphones with separate channels and adjustable volume controls, plus a receiver with adjustable antennas.

Product Overview

Professional Wireless Audio Performance

The PV-2118 VHF Wireless Dual Microphone System provides high-quality audio transmission suitable for vocal performances, presentations, and interactive events. This versatile dual-channel system features independent volume controls for each microphone, ensuring precise sound balancing. Engineered with advanced technology, it delivers stable connectivity over a 50-meter operating distance, making it ideal for KTV settings, family amusement, and outdoor activities.

Technical Specifications

Frequency Range	210-270 MHz
Frequency Response	40Hz - 20kHz
Operating Distance	50 m
Signal-to-Noise Ratio	80 dB
Total Harmonic Distortion	0.2 %

System Features

Ideal Use Cases

- KTV Performance
- Family Amusement
- Outdoor Activities
- Professional Presentations

Certifications & Compliance

VHF, FM Modulation, OEM Accepted

Power and Modulation

Modulation Mode	FM
Receiving Power	AC220V
Frequency Stability	± 0.005%
