

VHF/UHF Digital TV Antenna

This antenna is specially designed for receiving VHF and UHF signals. Its elements are strong, durable, anti-rust, waterproof, and weather-resistant.

Overview

High-Performance Digital TV Reception

This VHF/UHF digital TV antenna is engineered to provide reliable access to local over-the-air broadcasts. Designed for both attic and outdoor environments, its robust construction ensures resistance against harsh weather and rust. The unit features a tool-free installation process and a space-saving design, making it an efficient solution for improving TV signal quality.

Technical Specifications

VHF Frequency Range

174 MHz

Start Frequency

216 MHz

End Frequency

UHF Frequency Range

470 MHz

Start Frequency

698 MHz

End Frequency

VSWR Ratings

Band	Max VSWR
VHF	<3.0
UHF	<2.5

Impedance

75 Ω

Features

Key Features

- Full HD and digital TV signal reception
- Tool-free, snap-on installation
- Reflector panels for interference resistance
- F-type connection for effective signal transmission
- Space-saving retail packaging

Durability

Anti-rust, Waterproof, Weather Resistant
