

VHF/UHF Full Channel TV Antenna with Booster

This VHF/UHF full channel TV antenna is equipped with a booster for enhanced signal reception. It features 360° rotation, infrared remote control, and electrical rotation control for low noise, high gain, clear picture, and good voice quality.

Overview

Professional Grade TV Signal Reception

This VHF/UHF full-channel antenna is engineered for high-performance signal capture, featuring a robust multi-element array with dual directors and dipoles. Designed for reliability, the unit offers 360-degree rotation controlled via an infrared remote, ensuring optimal reception from any direction. With its rain-proof, solid structure, it provides a durable solution for clear picture and audio quality in various environments.

Technical Specifications

Signal Compatibility	VHF, UHF
Rotation Range	360°
Control Method	Infrared Remote Control
