

VHF/UHF Full Channel TV Antenna with Booster

This VHF/UHF antenna receives full channels. It features a booster, two directors, two dipoles, and full-direction 360° rotation for good receptivity.

Product Overview

High-Performance VHF/UHF Antenna

This VHF/UHF full-channel TV antenna is engineered for superior signal reception and clarity. Featuring a robust, rain-proof structure, it offers 360-degree rotation controlled via an infrared remote for optimal positioning. With its high-gain design and low-noise amplification, this antenna ensures a clear picture and quality audio for your broadcast needs.

Technical Specifications

Reception Capabilities	VHF, UHF, Full Channel
Rotation	360° Full-direction rotation
Control Method	Infrared remote control and electrical rotation

Performance Metrics

Key Performance Features

- Low noise amplification
- High gain signal output
- Clear picture quality
- High fidelity audio

Design & Construction

Structural Design

- Two directors
- Two dipoles
- Solid, rain-proof construction

Installation	Yes
