

VHF/UHF Full Channel TV Antenna with Booster

This VHF/UHF antenna receives full channels and includes a booster for improved signal strength. It features full-direction rotation via infrared remote control and electrical operation, providing low noise, high gain, and clear audio and video.

Product Overview

Professional Grade TV Signal Reception

This VHF/UHF full-channel antenna is engineered for high-performance terrestrial broadcast reception. Featuring a robust multi-element array with two directors and two dipoles, it delivers exceptional signal clarity and low-noise amplification. Designed for outdoor durability, its rain-proof construction ensures reliable performance in various weather conditions.
