

VHF/UHF Full Channel TV Antenna with Booster

This VHF/UHF antenna receives full channels and includes a booster for enhanced signal strength. It features 360° rotation controlled via infrared remote, providing low noise, high gain, and clear audio-visuals.

Overview

Professional Grade TV Signal Reception

This VHF/UHF full-channel TV antenna is engineered for superior signal clarity and reception. Featuring a robust, rain-proof design with 360-degree rotation capabilities, it ensures optimal connectivity in various environments. The system includes an infrared remote control for convenient, electrical rotation adjustments, making it a reliable solution for high-gain, low-noise signal amplification.

Technical Specifications

Control Method

- Infrared Remote Control
- Electrical Controlled Rotation

Frequency Compatibility

VHF, UHF

Rotation

360° Full-direction

Performance Features

Signal Performance

1 Low

Noise Level

1 High

Gain

Construction & Design

Design Highlights

Rain Proof • Solid Structure • Easy Installation
