

VHF/UHF Full Channel TV Antenna with Booster

This VHF/UHF antenna receives full channels and includes a booster for improved signal strength. It features full-direction (360°) rotation via infrared remote control and electrical control.

Overview

High-Performance TV Reception

This VHF/UHF full-channel TV antenna is engineered for optimal signal reception in both urban and rural environments. Featuring a robust multi-element design with integrated signal boosting, it delivers clear picture and audio quality even in areas with weak signal strength. The system includes 360-degree rotation capabilities controlled via infrared remote, ensuring easy alignment for the best possible broadcast reception.

Technical Specifications

Performance Metrics

0 Low

Noise Level
