

VHS Video Cassette Tapes

VHS video cassette tapes are designed for recording and playing back video content using a VCR. Each tape features a standard VHS casing with a window to view the tape inside.

Product Overview

Standard VHS Video Cassettes

These VHS video tapes are designed for high-quality recording and playback using standard Video Cassette Recorders (VCR). Each tape features a durable black casing with a built-in viewing window to monitor the tape reel progress. They include a dedicated white labeling area for easy organization and identification of recorded content.
