

# Vibratory Motor Exciter Unit

This vibratory motor exciter unit is used for vibrating screens, feeders, and compacting equipment. It features a robust enclosure and mounting feet for secure installation.

## Overview

### Industrial Vibratory Exciter

This robust vibratory motor exciter unit is engineered for demanding industrial applications, including vibrating screens, material feeders, and compacting equipment. Featuring a durable, high-visibility yellow enclosure, the unit is designed to withstand harsh operating environments. It includes secure mounting feet for stable installation and an integrated junction box for reliable electrical connectivity.

## Physical Characteristics

Finish	Yellow-painted enclosure
Mounting	Integrated mounting feet

## Applications

Typical Applications	Vibrating Screens, Material Feeders, Compacting Equipment
----------------------	---

## Electrical

Connectivity	Integrated junction box
