

Vibratory Soil Compactor Roller

This vibratory roller is a robust machine suited for various construction and maintenance tasks. It delivers reliable power for effective soil and asphalt compaction, featuring user-friendly controls for ease of operation.

Overview

Versatile Compaction Performance

This vibratory soil compactor roller is engineered for demanding road construction and site preparation tasks. Powered by a reliable 5.5HP petrol engine, the unit offers a hydraulic drive system for smooth operation across various soil types and asphalt surfaces. Its compact build ensures superior maneuverability in restricted workspaces while maintaining consistent compaction force.

Technical Specifications

Engine Power Output

5.5 HP
Max Power

Engine Type	Honda GX160 Petrol Engine
-------------	---------------------------

Performance Data

Static Linear Load	200 N/cm
Operating Speed	4 km/h
Gradeability	16 %
Centrifugal Force	13.5 kN

Dimensions

Drum Dimensions	600*Æ400m, 600*Æ500m
-----------------	----------------------
