

Video Intercom System with Two-Way Communication

This video intercom system enables two-way communication and video transmission. It supports inner calling and hands-free communication, capturing images on a 1 GB memory card and offering adjustable brightness, color, and contrast.

Overview

Professional Access Control

This video intercom system offers a robust solution for monitoring and controlling entry to your premises. Featuring high-quality two-way audio and visual communication, it enables users to verify visitors before granting access. The system is designed for security and convenience, integrating seamlessly into existing property management workflows.

System Features

Key Functionalities

- Two-way audio communication
- Real-time video monitoring
- Remote door release
- Night vision capability

Certifications

Industry Compliance

CE, RoHS, FC

System Components

Included Equipment

Component	Primary Function
Outdoor Station	Integrated camera and visitor call interface
Indoor Monitor	Display screen for visual identification
