

Vineyard Anti-Bird Netting

Anti-bird netting provides a barrier to prevent birds from accessing specific areas. It is suitable for use in gardens, fruit trees, and straw protection.

Product Overview

Professional Crop Protection

This high-quality anti-bird netting is designed to provide effective pest control for vineyards, orchards, and gardens. Constructed from durable, UV-treated HDPE, the knitted mesh offers high tensile strength and excellent flexibility while resisting aging and erosion. Its versatile design ensures crops remain protected from birds while maintaining necessary airflow and sunlight for healthy plant development.

Technical Specifications

Colors

Green • Black • White • Red

Material	HDPE (High-Density Polyethylene)
UV Protection	Yes
Available Mesh Patterns	Square, Diamond, Hexagonal

Dimensions & Weight

Net Weight Range

- 15g/m²
- 17g/m²
- 20g/m²
- 30g/m²
- 35g/m²
- 40g/m²
- 45g/m²
- 50g/m²
- 60g/m²

Customization Options

Parameter	Range
Length	1m - 500m
Width	1m - 15m
Weight Density	15g/m ² - 300g/m ²
