

Vintage CRT Television

This vintage television set features a standard-definition display and a traditional cathode-ray tube (CRT) technology. It includes a built-in tuner for analog broadcast signals and composite video inputs for connecting external devices.

Product Overview

Vintage Cathode-Ray Tube Television

This vintage television set features a classic design powered by traditional cathode-ray tube (CRT) technology. It is equipped with a standard-definition display, a built-in analog broadcast tuner, and dedicated composite video inputs for external device connectivity. The unit is housed in a sturdy cabinet with intuitive front-mounted controls for seamless volume and channel adjustment.
