

Vintage CRT Television with AM/FM Radio

This vintage-style television features a cathode ray tube (CRT) display. It also includes an integrated AM/FM radio for versatile entertainment.

Product Overview

A Classic Combination

This vintage-style television integrates a classic cathode ray tube (CRT) display with a built-in AM/FM radio receiver. Housed in a durable gray plastic chassis, the unit features traditional tactile controls for volume and station tuning, complemented by a telescopic antenna for improved signal reception. This combination device provides an authentic retro experience for collectors and enthusiasts of mid-century electronics.
