

Virtual Tape Library Backup System

This virtual tape library backup system is an efficient and scalable solution for modern data protection needs. It offers high capacity and performance, enabling fast backup and recovery times.

Overview

Professional Virtual Tape Library Backup System

The BL2000 is an efficient and scalable virtual tape library designed for robust enterprise data protection. It provides a reliable, cost-effective solution for both active backup and long-term archiving needs. Featuring advanced data deduplication and compression, the system significantly reduces storage overhead while maintaining fast recovery times.

Core Features

Operational Benefits

- Fast backup and recovery performance
- Cost-effective storage expansion
- Comprehensive monitoring tools
- User-friendly management interface

Key Capabilities

Data Deduplication, Data Compression, Tape Drive Emulation, Scalable Architecture

Compatibility

Software Compatibility

Industry Standard Backup Software • Existing IT Infrastructure
