

Visual Signaling Revolving Safety Light

This revolving light is a safety device used for visual signaling. It features durable ABS plastic construction and compact dimensions.

Product Overview

Professional Visual Signaling

The 330A revolving safety light is a robust visual signaling device engineered for industrial environments. Constructed from durable ABS plastic, it offers reliable performance in demanding settings. Its compact design ensures easy integration into existing machinery or safety systems, providing clear, high-visibility alerts.

Physical Specifications

Housing Material	ABS Plastic
Diameter	180 mm
Height	140 mm

Logistics & Packaging

Packaging Specifications

Metric	Value
Quantity per Package	24 Sets
Gross Weight	14.5 kg
Packing Dimensions	52.5 x 41 x 45 cm

Model Identifier

330A
