Overview

Intelligent Voice Thermometer

This AI-powered digital thermometer provides a seamless, hands-free solution for monitoring body temperature. Designed for efficiency and accuracy, it features near-field automatic detection and instant voice feedback for rapid health monitoring. With a measurement time of just 0.5 seconds, it is an ideal tool for maintaining safety protocols in various professional settings.

Measurement Speed

0.5 seconds

Response Time

Accuracy Tolerance

0.1 °C

Features

Key Capabilities

- Near-field automatic temperature measurement
- Intelligent voice temperature reporting
- High-temperature automatic alarm
- Low-temperature prompt
- Visual alerts for temperature status

Technology

AI-Powered, Infrared Probe, Hands-Free, Voice Feedback
