Product Overview

Professional Kitchen Ventilation

This advanced kitchen range hood features a sophisticated design combining stainless steel and black glass, perfect for modern commercial or residential kitchens. It utilizes a powerful motor and intelligent sensing technology to efficiently remove smoke, grease, and odors. With its low-noise operation and energy-efficient performance, this unit ensures a clean and comfortable cooking environment.

Total Pressure Efficiency	28%
Energy Efficiency Index	Level 1

Physical Attributes

Dimensions	895 x 650 x 520 mm
Model Number	CXW-220-Z1810(B)

Features

Key Features

- Voice-activated controls
- Temperature sensing technology
- Stainless steel and black glass construction
- Integrated LED lighting
- Removable grease filter
