

# Voice Controlled Smart Home Automation System

This system facilitates AI voice control for automating smart home functions. It enhances convenience and energy efficiency through voice-activated commands.

## Overview

### Smart Home Automation Solution

This voice-controlled smart home automation system provides a comprehensive solution for modern residential environments. By integrating smart switches, voice assistants, and centralized control hubs, the system enables seamless automation of home functions. Designed to enhance both convenience and energy efficiency, it offers a versatile ecosystem for managing lighting and connected appliances.

## System Components

### Supported Device Models

- HD09T/OT
- HD29L/OL
- HD29X/OX
- HD29Z/OZ
- SL2A86
- SL2B86
- SL2C86
- SL29US118

### Switch Types

86 box switch, 118 box switch

## Features

### Key Capabilities

Voice Control • Home Automation • Energy Efficient • Smart Hub Integration
