

Volumetric Flow Meter for Liquid and Gas Measurement

Volumetric water meters are engineered for the precise measurement of liquid and gas flow. Featuring a durable build, these meters suit residential, commercial, and industrial environments.

Product Overview

Precision Flow Measurement

These volumetric flow meters are engineered for accurate liquid and gas measurement across residential, commercial, and industrial environments. Featuring robust construction, they ensure reliable performance and a long service life in various plumbing configurations. Each unit includes a clear, easy-to-read register for precise tracking of cumulative flow volume.

Technical Specifications

Flow Rate

1.5 m³/h
Rated Flow

Pressure Rating

PN1.0 • 1.6MPa • 0.1MPa

Temperature Rating

- 40°C
- 50°C

Connection Size

DN 15

Measurement Unit

m³

Reference IDs

0704000002, 05870104, 04110505
