

Volumetric Water Meter for Cold Potable Water

This volumetric water meter is designed for measuring the total quantity of cold potable water passing through a pipeline. It is suitable for both residential and industrial applications.

Product Overview

Precision Flow Measurement

This volumetric water meter is engineered for the reliable measurement of cold potable water in both residential and industrial pipeline systems. It features a robust dry-dial register with magnetic transmission, ensuring high accuracy and long-term durability. Designed to meet international quality standards, it provides consistent performance under standard operating pressures.

Technical Specifications

Nominal Flow Rate (Qn)	1.6 m ³ /h
Pressure Loss (P)	< 0.1 MPa
Temperature Class	D-8

Standards & Compliance

Compliance Standards	ISO 4064 Class B
----------------------	------------------

Key Features

Design Features

- Volumetric measurement principle
- Dry-dial register
- Magnetic transmission
- High measurement accuracy

Suitable Applications

Residential • Industrial • Cold Water Systems
