

# Vortex Water Pump for Clean Water Transfer

This vortex water pump is designed for clean water transfer and pressure boosting in domestic settings. It is suitable for small garden irrigation and general water supply, delivering consistent performance.

## Product Overview

### Vortex Water Pump Series

The QB/DB/CP vortex water pump series is engineered for the efficient transfer of clean water. It is an ideal solution for domestic pressure boosting, small garden irrigation systems, and general residential water supply needs. Built with a robust housing and a reliable motor, this pump ensures consistent performance and durability for moderate flow and pressure requirements.

## Technical Specifications

### Model Series

- QB Series
- DB Series
- CP Series

### Pump Category

Vortex

### Suitable Applications

Clean Water Transfer, Domestic Pressure Boosting, Garden Irrigation, General Water Supply
